Preface

The main objective of developing this project was to gain practical, hands-on experience in software development. As students, applying theoretical knowledge into a real-world project has helped us understand the core concepts of system design, analysis, and implementation more effectively. This project served as a platform to enhance both technical and problem-solving skills.

Eventify – Wedding Management Platform is designed as a complete digital solution for planning, organizing, and managing wedding events. It aims to reduce the manual workload involved in traditional wedding planning and provides a structured, efficient, and user-friendly system for families, vendors, and administrators.

Through the development of this project, we were able to apply various software engineering concepts such as requirement gathering, system design, database management, and testing. This experience not only strengthened our technical foundation but also gave us insight into solving real-world challenges through technology.

Acknowledgement

We are students of BCA Semester-5 studying in **Kamani Science & Prataprai Arts College, Amreli**. We thank all the people who have given their support in shaping this system.

We sincerely thank **Ms. Dhruvita Savaliya** for giving us guidance and co-operation in understanding the system. We also thank her for her unconditional help in the completion of this project.

We express our gratitude towards our **Head of Department**, who encouraged us in taking up this activity. We thank all faculties and administrative staff of the institute for their support.

We are also thankful to all those friends who have helped us in this endeavor, either directly or indirectly, and especially our families for their constant support.

Thanks to all!!

Parekh Brijesh & Parth Parmar

Abstract

Eventify – Wedding Management Platform is a web-based system developed to simplify and modernize the process of wedding planning. It provides an organized digital solution that helps families and couples overcome the challenges of managing large-scale wedding events.

The platform offers essential features such as guest list management, vendor booking, budget tracking, event scheduling, and secure payment handling. All these functions are centralized, which makes it easier for users to coordinate different aspects of wedding management in one place.

By providing a user-friendly and intuitive interface, Eventify reduces the complexity of traditional wedding planning. It ensures smooth communication and better coordination between couples, families, and vendors, resulting in a hassle-free and well-organized wedding experience.

Introduction

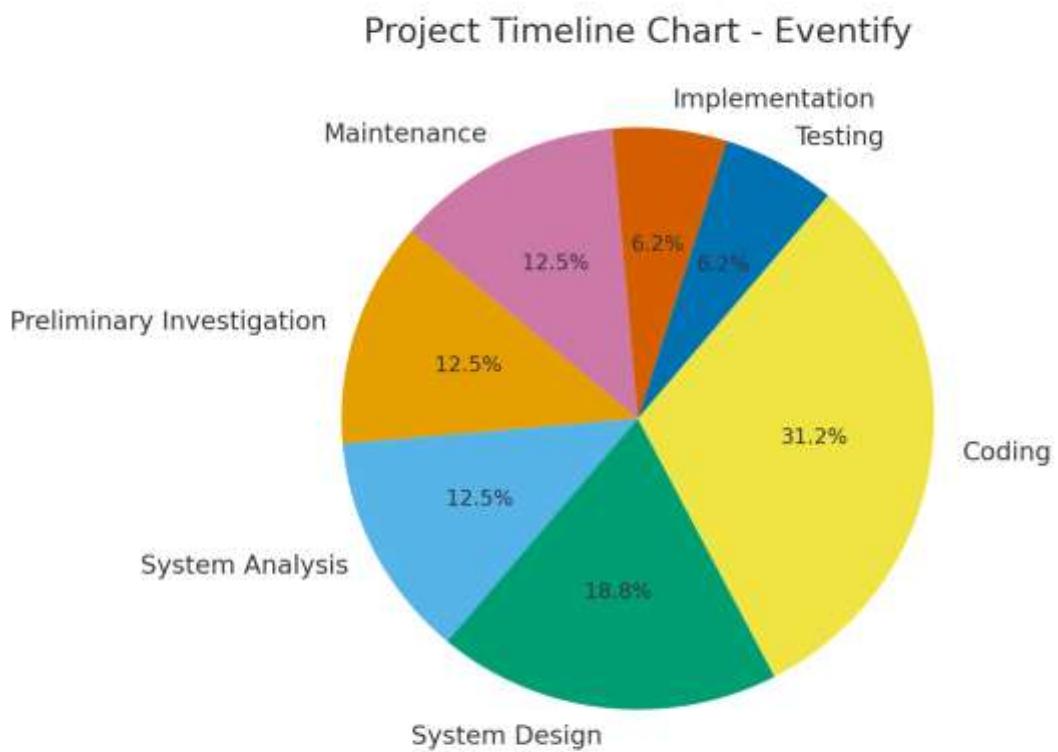

Weddings are one of the most significant events in a person's life and require proper planning, organization, and execution. Traditionally, families and event organizers have relied on manual methods such as paper records, phone calls, and physical meetings to manage weddings. While these methods can work, they are often time-consuming, error-prone, and inefficient, especially when dealing with large guest lists, multiple vendors, and complex event schedules.

Eventify – Wedding Management Platform provides a modern digital solution to these challenges. It is a web-based system designed to centralize all aspects of wedding management into a single platform. Couples and families can use Eventify to plan their events more effectively, while vendors and administrators can manage their services, bookings, and payments with greater ease. This eliminates the need for multiple tools and reduces miscommunication.

The platform offers multiple modules tailored to different stakeholders. For couples and families, features such as **guest management, event scheduling, budget tracking, and vendor booking** help streamline the planning process. Vendors can manage their services, track bookings, and receive payments securely. Administrators can oversee the system, manage user accounts, and ensure smooth operations. Additionally, Eventify provides **real-time updates**, which enable better coordination and minimize the chances of mistakes or delays.

In short, Eventify aims to transform the traditional wedding planning process into a digital, efficient, and hassle-free experience. By integrating technology into wedding management, it not only saves time but also enhances accuracy, convenience, and user satisfaction.

Time Line Chart

Process	Time
Preliminary Investigation	10 Days
System Analysis	10 Days
System Design	15 Days
Coding	25 Days

Project Profile

> Project Name	Eventify – Wedding Management Platform
> Developed By	Parekh Brijesh & Parth Parmar
> Front End Tools	HTML, CSS, JavaScript, Bootstrap
> Back End Tools	PHP, MySQL
> Operating System	Microsoft Windows 11
> Computer System	Core i3 or Higher, RAM 8 GB
> Project Details	Eventify provides an all-in-one solution for wedding planning and management. It helps couples manage guest lists, budgets, vendor bookings, and event scheduling through a single platform.
> Completion Time	2 Months
> Guided By	Ms. Dhruvita Savaliya
> Submitted To	Saurashtra University, Rajkot

Hardware Requirement

Processor	AMD Ryzen 3 7320U with Radeon Graphics
Ram	8 Gb
Hard Disk	512 Gb
Monitor	Standard Display
Input Device	keyboard

Software Requirement

Operating System	Windows 11
Front End Tools	HTML, CSS, JavaScript, Bootstrap.
Back End Tools	PHP, MySQL
Documentation Tool	Microsoft Word 2016 or later
Browser	Google Chrome, Mozilla Firefox
Editor	vs Code
Server	XAMPP (Apache, mysql)

Requirement Specification

1. Registration & Login

- Users (Couples/Families) can **sign up** and create an account.
- Registered users can **log in** securely to access their dashboard.
- Admin has a **separate login panel** to manage the system.

2. User Profile Management

- Users can view and update their **profile page** after login.
- Profile includes personal details, contact information, and booking history.

3. Event Booking (Request System)

- Users can book an event by filling an online booking form with details such as date, venue, and services required.
- Booking requests are sent to the **Admin Panel** for review.
- Admin can contact the user for confirmation and offline payment arrangements.

4. Venue & Package Display

- In the **User Panel**, users can browse available **venues with price details**.
- Service packages (catering, decoration, photography, etc.) are shown with estimated cost for better planning.

5. Guest Management

- Users can create and manage their **guest list**.

6. Budget Management

- Users can maintain a digital **budget tracker**.
- Expenses from selected services/venues are shown for planning purposes (only estimation, not actual payment).

7. **Reports**

- Users can view their **event booking summary** and guest details.
- Admin can generate reports of all users, bookings, and event details.

Problem Definition

- **Time-Consuming Process**

Traditional wedding planning requires a lot of manual work such as visiting venues, contacting service providers, and managing guest lists on paper. This makes the process slow and stressful.

- **Guest Management Challenges**

Handling large guest lists manually often leads to errors, duplication, and difficulty in tracking RSVPs or attendance.

- **Communication Gaps**

Families often face difficulties in maintaining proper communication among themselves regarding event schedules, arrangements, and responsibilities, which can lead to delays and confusion.

- **Lack of Centralized Platform**

Currently, there is no single platform where all wedding-related activities such as venue selection, service booking, guest management, and event scheduling can be managed together.

- **Budget Tracking Difficulties**

Without a proper digital system, it becomes difficult to monitor expenses, compare service costs, and maintain financial control during wedding planning.

Project Planning & Scheduling

Project planning is an essential part of project management that ensures all tasks are well-organized and aligned with project objectives. It helps in coordinating activities, monitoring progress, and maintaining control over timelines.

Project scheduling is a key component of planning, where tasks are arranged in sequence with specific deadlines. This ensures timely completion of the project and smooth execution, even when multiple activities are running in parallel.

SDLC Life Cycle

System Analysis

System analysis identifies objectives and requirements, evaluates alternatives, and provides feasible solutions. Eventify is designed to minimize errors in wedding planning by providing an easy-to-use web-based system.

Question - Answer

1) What is the Title of your Project?

= Eventify – Wedding Event Management System

2) What is the Purpose of your Project?

= The purpose of Eventify is to provide a digital platform for users to plan and manage various event-related activities by booking vendors, selecting services, and getting quotations online.

3) What type of Project is this?

= This is a Web-based application project in the domain of Event Planning and Management (focusing specially on weddings).

4) What Problem does your Project solve?

= It simplifies the wedding planning process by bringing all services to a single digital platform.

5) Who can be the target users of your Project?

- Engaged couples
 - Families planning weddings
 - Event organizers
 - Wedding planners
-

6) What are the main modules of your Project?

- User Login / Signup
 - Venue Booking Process
 - Service Selection
 - Budget Generation
 - Admin Panel (Dashboard, Control & Feedback)
-

7) What technologies will you use in your Project?

- Frontend: HTML, CSS, JavaScript, Bootstrap
 - Backend: PHP
 - Database: MySQL
-

8) Which SDLC model are you following?

= The Waterfall model, where each phase like requirement gathering, design, development, testing, and deployment is completed in sequence.

9) What are the advantages of your System?

- Time saving
 - User-friendly interface
 - Online booking facility
 - Centralized management of services
 - Reduces minimum coordination efforts
-

10) What are the limitations of your Project?

- Limited to wedding events only
 - Requires internet connection
-

11) How does your System handle user data?

= User data such as registration info, bookings, and selected services are securely stored in a database and only accessible through login.

12) What is the expected output of your Project?

= A fully functional web-based wedding event management system where users can browse packages, select services, book events, and generate cost estimates.

13) How is the Admin involved in the System?

= The Admin can view and manage all bookings, update available services, manage user queries, and add/edit venue and package details from the backend.

14) What is the current progress of your Project?

= The login/signup, homepage UI, header/footer, and basic services layout pages have been completed. The database design and backend integration are in progress.

15) What are your next steps?

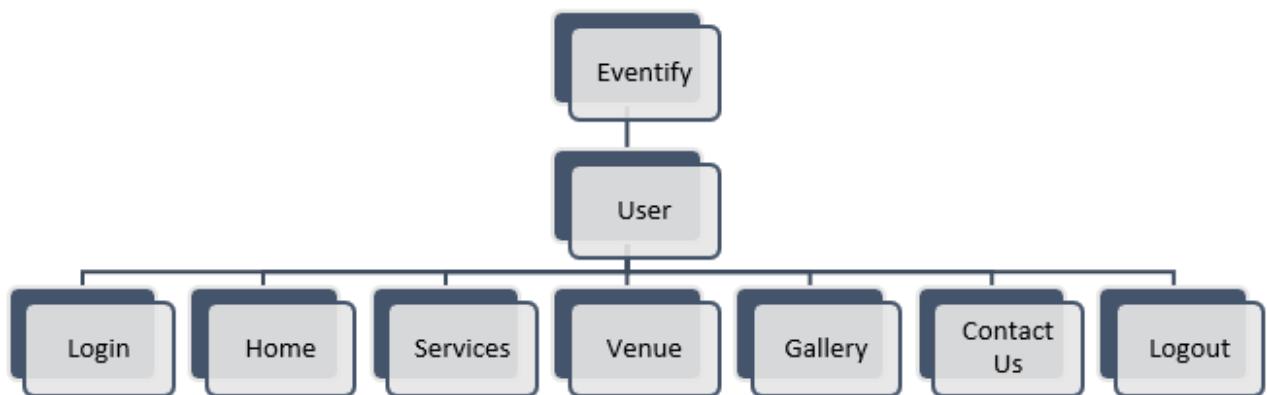

- Complete backend functionality
- Connect database
- Implement admin panel
- Test full workflow
- Prepare project documentation

Feasibility Study

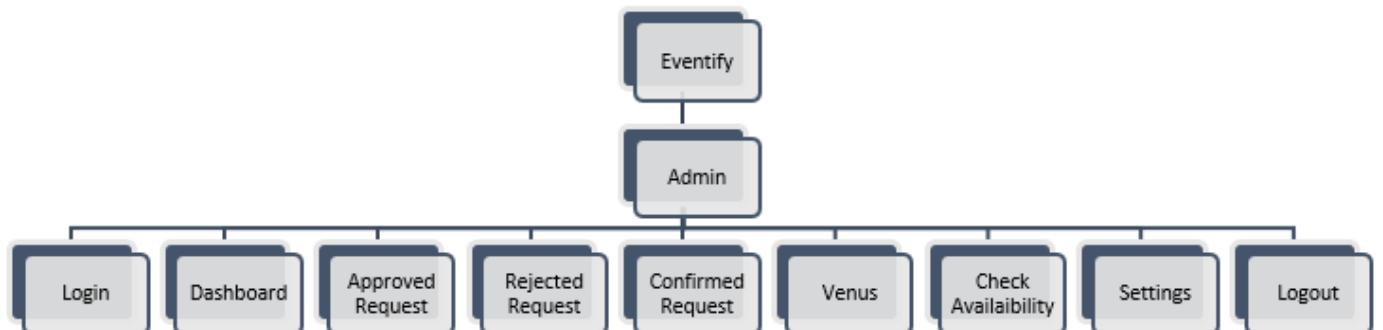

- Technical Feasibility – Uses common web technologies like PHP, MySQL, Bootstrap, making it easily implementable.
- Operational Feasibility – Easy to use for users, vendors, and admins.
- Economic Feasibility – Cost effective, requires only one-time development and future updates.

Our Vision

At Eventify Event Management, our vision is to become Gujarat's leading event management company, committed to creating unforgettable experiences for the Gujarati community and for those choosing Gujarat as their destination for weddings and special occasions. We aim to redefine the event planning industry through innovative, seamless, and highly personalized services, ensuring every event—whether in cities, towns, or villages—celebrates the rich traditions and cultural values of Gujarat.

In addition, Eventify envisions becoming the most trusted venue booking platform in Gujarat. With over 5 years of experience, we strive to be the go-to destination for clients seeking reliable, detailed, and curated information about event venues. By offering a one-stop solution for venue selection and complete event services, we eliminate the hassle of searching across multiple platforms—making event planning easier, faster, and more efficient.

Our Mission

At Eventify Event Management, our mission is to deliver exceptional and professional event planning services across the entire state of Gujarat — from the vibrant cities of Ahmedabad and Surat to the cultural heartlands of Rajkot and Bhuj. We are dedicated to serving the diverse communities of Gujarat, as well as clients from across India and abroad who choose this culturally rich and colorful state to celebrate their most cherished moments.

We strive to make high-quality event services accessible not only in major cities but also in rural areas, small towns, and villages throughout Gujarat. Our approach blends creativity, cultural sensitivity, and meticulous attention to detail to bring every client's vision to life — whether it's a traditional or destination wedding, a corporate function, or a private celebration.

With over 5 years of industry experience, Eventify aims to become Gujarat's most trusted venue booking platform. We provide clients with curated, comprehensive, and reliable information on a wide range of event venues, eliminating the hassle of searching across multiple sources. As a one-stop solution for both venue booking and complete event services, we are committed to making every event planning journey seamless, stress-free, and truly unforgettable.

Achivements of Eventify

Over the past 5 years, Eventify Event Management has successfully organized and executed over 500+ weddings, and private celebrations across Gujarat. Our portfolio includes events ranging from intimate gatherings to grand, large-scale productions in cities like Ahmedabad, Vadodara, Rajkot, and beyond. Our consistent quality and creativity have earned us the trust of countless clients and glowing reviews across social platforms.

Eventify has also built a strong network of 200+ trusted vendors, including decorators, caterers, photographers, entertainers, and venue partners. Our commitment to excellence has made us one of the most recommended event planners in the region, with multiple features in local magazines and collaborations with well-known venues. We take pride in turning every event into a memorable, picture-perfect experience.

• SERVICES

Wedding Planner

The screenshot shows the "Edit Profile" page. The sidebar on the left is identical to the previous dashboard. The main area has a heading "Edit Profile" and a section titled "Update Your Information". It contains four input fields in a grid: "Username" (parth123), "Email" (parth@gmail.com), "Phone" (9876543210), and "Old Password" (placeholder). Below these are "New Password" and "Confirm New Password" fields, both with "Enter new password" placeholders. A "Save Changes" button is at the bottom. A "Logout" button is in the top right corner.

- ADMIN PROFILE

The screenshot shows the Eventify Admin Dashboard. On the left, there's a sidebar with a dark background and white text. The sidebar includes links for Dashboard, Approved Requests (which is highlighted in blue), Rejected Requests, Confirmed Requests, Venues, check Availability, and Settings.

The main area is titled "Admin Dashboard". At the top right, it says "Welcome, brijesh" and has a "Logout" button. Below the title, there are four boxes showing statistics: Total Requests (6), Approved (2), Pending (0), and Rejected (1).

A section titled "Latest Requests" follows, featuring a table header with columns: ID, Name, Phone, Email, Date, Guests, budget, City, Venue, Type, Time, Status, and Action. Below the header, a message says "No Records Found".

This screenshot shows the "Approved Requests" section of the Admin Dashboard. The sidebar on the left is identical to the previous one, with "Approved Requests" being the active tab.

The main area is titled "Admin Dashboard" and shows a table titled "Approved Requests". The table has columns: ID, Name, Phone, Email, Date, Guests, budget, City, Venue, Type, Time, and Status. It lists two entries:

ID	Name	Phone	Email	Date	Guests	budget	City	Venue	Type	Time	Status
2	Parekh brijesh a	6359061142	parekhbrijesh01@gmail.com	2025-09-03	100	50000	Amravati	Tulsi party plot	wedding	night	approved
5	Parekh Brijesh A	99874563210	parth@gmail.com	2025-09-18	100	80000	amravati	Vrundavan Hall	Wedding	Day	approved

Confirmed Requests

ID	Name	Phone	Email	Date	Guests	Budget	City	Venue	Type	Time	Status
1	Parmar Parth p	9876543210	parth@gmail.com	2025-08-26	100	500000	Amreli	Tulsi Partyplot Amreli.	Wedding	Day	confirmed
6	NIL BHAVIN PAREKH	6552369875	nil@gmail.com	2025-09-29	50	150000	AHEMDABAD	GreenDivine Special For Night	Wedding	Evening	confirmed
7	VISHAL MAKWANA	7845123698	vishal@gmail.com	2025-09-17	50	50000	amreli	Vrundavan Hall	Wedding	Evening	confirmed

The screenshot shows the Admin Dashboard with a sidebar on the left containing links: Eventify, Dashboard, Approved Requests, Rejected Requests, Confirmed Requests, Venues (which is highlighted in blue), Check Availability, and Settings. The main content area is titled "Admin Dashboard" and features a "Add New Venue" form. The form has four input fields: "Venue Name" (placeholder: Enter venue name), "Venue Price" (placeholder: Enter price), "Venue Location" (placeholder: Enter location), and "Capacity" (placeholder: Enter capacity). A "Submit" button is located at the bottom right of the form.

The screenshot shows the Admin Dashboard with the same sidebar as the previous screenshot. The main content area is titled "Admin Dashboard" and features a "Booking Records" section. It includes a search bar with placeholder "Search by Date: dd-mm-yyyy" and buttons for "Search" and "Reset". Below the search bar is a table with the following data:

ID	Full Name	Email	Date	Venue
6	NILBHAWN PAREKH	nl@gmail.com	2025-09-29	GreenDivine Special For Night
5	Parekh Brijesh A	parth@gmail.com	2025-09-18	Mundwan Hall

1	Farmar Parth P	parth@gmail.com	2025-08-26	Tulsi Partyplot Amravati

Coding

1) Login.php

```

<?php

session_start();

include 'connection.php';

$username = $_POST['username'];

$password = $_POST['password'];

// Query user data

$sql = "SELECT id, UserName, Password, email FROM signup_data WHERE UserName = ?";

$stmt = $conn->prepare($sql);

$stmt->bind_param("s", $username);

$stmt->execute();

$result = $stmt->get_result();

if ($result->num_rows === 1) {

    $row = $result->fetch_assoc();

    if (password_verify($password, $row['Password'])) {

        //  If admin (username = brijesh)

        if ($row['UserName'] === 'brijesh') {

            $_SESSION['admin_id'] = $row['id'];
        }
    }
}

```

```
$_SESSION['admin_name'] = $row['UserName'];

header("Location: admindashboard.php");

}

//  Else normal user

else {

    $_SESSION['user_id'] = $row['id'];

    $_SESSION['user_name'] = $row['UserName'];

    $_SESSION['email'] = $row['email'];

    header("Location: index.php");

}

exit;

} else {

    echo "<script>alert('X Incorrect password!');";
    window.location.href='login.php';</script>";

}

} else {

    echo "<script>alert('X Username not found!');";
    window.location.href='login.php';</script>";

}

?>
```

2) Signup.php

```
<?php

$host = "localhost";
$db_user = "root";
$db_pass = "";
$db_name = "eventify";

if ($_SERVER["REQUEST_METHOD"] === "POST") {

    $username = trim($_POST['username'] ?? '');
    $email = trim($_POST['email'] ?? '');
    $number = trim($_POST['phone'] ?? '');
    $password = $_POST['password'] ?? '';
    $confirmpassword = $_POST['confirmpassword'] ?? '';

    // Collect missing fields
    $missing = [];
    if (!$username) $missing[] = 'Username';
    if (!$email) $missing[] = 'Email';
    if (!$number) $missing[] = 'Phone number';
    if (!$password) $missing[] = 'Password';
    if (!$confirmpassword) $missing[] = 'Confirm password';

    if (!empty($missing)) {
        http_response_code(400);
    }
}
```

```
echo "Please fill in the following fields: " . implode(", ", $missing);

exit;

}

if ($password !== $confirmpassword) {

    http_response_code(400);

    echo "Passwords do not match.";

    exit;

}

$conn = new mysqli($host, $db_user, $db_pass, $db_name);

if ($conn->connect_error) {

    http_response_code(500);

    echo "Database connection failed: " . $conn->connect_error;

    exit;

}

if (strtolower($username) === 'brijesh') {

    http_response_code(403);

    echo "☒ Username 'brijesh' is reserved and cannot be used.";

    exit;

}

// Check if username already exists

$stmt = $conn->prepare("SELECT id FROM signup_data WHERE UserName = ?");

$stmt->bind_param("s", $username);

$stmt->execute();
```

```
$stmt->store_result();

if ($stmt->num_rows > 0) {
    http_response_code(409);
    echo "Username already taken.";
    $stmt->close();
    $conn->close();
    exit;
}

$stmt->close();

// Hash the password
$hashed_password = password_hash($password, PASSWORD_BCRYPT);

$stmt = $conn->prepare("INSERT INTO signup_data (UserName, email, number,
Password) VALUES (?, ?, ?, ?)");
$stmt->bind_param("ssss", $username, $email, $number, $hashed_password);

if ($stmt->execute()) {
    echo "<script>
        alert('Registration Successful!');
        window.location.href = './login.php';
    </script>";
} else {
    http_response_code(500);
    echo "SQL error: " . $stmt->error;
}
```

```
$stmt->close();  
$conn->close();  
  
} else {  
    http_response_code(405);  
    echo "Invalid request.";  
}  
?>
```

Testing

What is testing?

Testing is the process of evaluating and verifying that a software product or application does what it is supposed to do.

- Types of Testing:-

- **Manual testing**
- **Automation testing**

TestCase

- **Login Form**

Test Case ID	Test Step	Input Data	EXPECTED RESULT	Actual Result	Execution Status
001	Enter Username and Password & click on login button	Enter invalid Username and invalid Password	User should be go on info page	User Not login successfully	Not successfully
002	Enter Username and Password & click on login button	Enter valid Username and invalid Password	User should be go on info page	User Not login successfully	Not successfully
003	Enter Username and Password & click on login button	Enter invalid Username and valid Password	User should be go on info page	User Not login successfully	Not successfully
004	Enter Username and Password & click on login button	Enter valid Username and valid Password	User should be go on info page	User login successfully	Successfully

Pros and Cons of System

- **Advantages of system**

1. **Time Saving :**

Reduces effort by allowing quick booking and planning.

2. **Convenience for users :**

All wedding services accessible on one platform.

3. **Transparency in pricing and reviews :**

Users can compare costs and quality before booking.

4. **24/7 availability :**

Accessible anytime without dependency on office hours.

- **Disadvantages of system**

1. **Internet dependency :**

Requires stable internet for smooth use.

2. **Trust issues :**

Some users may not feel secure booking online.

3. **Payment security :**

Online payments need strong fraud protection.

Bibliography

Bibliography means take reference to prepare any project. Here I concern the book and website which takes reference is as under.

References:

- www.google.com
